Petron Plus™ Formula 7 Fuel Injector Cleaner is a premium gasoline supplement package.

Today’s gasoline engines have to meet rigid standards for both fuel economy and emissions control. As a result, modern engines operate in highly sensitive environments.

Deposits anywhere in the intake system can cause driveability problems. Thus, the need for a superior deposit control product like 20001 is even greater.

This product helps clean engine deposits from fuel injectors and/or carburetors; thereby restoring engine performance, increasing fuel economy, smoothing out rough idling, and protects against rust and corrosion.

If used on a regular basis (once every oil change), it will help control deposit build-up.

Available in 10 ounce bottles, 5 gallon pails, & 54 gallon drums.

APPLICATIONS:
2. For vehicles with fuel related problems.

FEATURES:
1. Cleans engine deposits from fuel injectors and/or carburetors.
2. Helps control deposits build-up. Will not create deposits on other important engine parts.
3. Helps restores Injectors Performance to like new condition.
4. Helps restores engine performance and power.
5. Safe for catalytic converters.
6. Helps engine knock, ping, and run-on.
7. Helps increases fuel economy.
8. Helps improves driveability and reduces exhaust emissions.
9. Protects against rust and corrosion.

BENEFITS:
1. Reduces maintenance costs.
2. Faster starting.
3. Reduce fuel consumption.
4. Helps reduce exhaust emissions.
5. Smoother engine operation.

DIRECTIONS

Add to gasoline when gas tank is nearly empty. Dispose of empty container properly. Refuel with up to 18 gallons of gasoline. Repeat treatment every 3,000 miles (or at scheduled oil change intervals).

One treatment should provide noticeable improvement in the operation of any gasoline engine. Some deposits are more difficult to clean, particularly those on intake valves and combustion chambers. In these cases a second treatment may be beneficial. Once this product has been used, engine deposits can be kept to a minimum with regular use.
